Katrina,

Thanks for taking the time last week for my visit to the Wilcox site. I appreciate you providing a thorough overview of EPA's involvement and environmental sampling, and taking me around to see the site and the interesting ongoing lead sampling/XRF analysis. I was very much prepared for the EPA availability session that evening.

Following up after the site visit I reviewed my files and identified information/data that would be helpful. Can you send electronic copies of maps with the sampling locations for the VI, soil gas, drinking water, and surface water samples collected in 2016. You also had maps with the ROST screening overlaying the different areas of the site with structures. It would be helpful if you could send Excel files with the 2016 surface water and soil gas sampling data. You mentioned you have a KMD file (or was it a KML file) with all the sampling through April 2016. Can you send that file?

I would like any health issues or concerns EPA has documented at this site.

Finally, what is your timeline for getting the results of the 2017 sampling (sediment/surface water, soil, waste, and the XRF lead sampling)?

Thanks again for all your assistance and I look forward to working with you on this site.

Jack

Hi Jack, most excellent. We are currently in the RI phase and there is not final report for the data tables listed in your email. It may be best to follow-up with a call so that we can make sure that you get all of the data we have.

I have soil data, however, the soil data are currently located in multiple lab files. I will try to find out the status of data entry and get back with you.

Based on your list of documents and excel files, it appears that you have all of the information generated for the site thus far, except for the soil as mentioned above.

Vapor Intrusion Detection data Excel - (Air Sampling Summary LPA and WPA data dated 9/2016) – no report—the data table is the only list

Residential Groundwater Well Detection Tables Excel- (Detection Summary for GW-3,4,6,7,8,9,10,12,13,14,17 dated 9/2016) – no report—data table is the only list

Wilcox Summary 20150831_R3 Excel (soil data dated 5/2016 and 6/2016) – assume this to be the Removal Assessment report which you indicate you have.

Subject: Wilcox Oil Company site

Katrina,

I'm Jack Hanley with ATSDR in Atlanta. I'm the health assessor that will be working on the Wilcox site.

Thanks responding to my questions about the site in such a timely manner. I received a copy of your request for public health education at the Wilcox site on community members' environmental health exposure questions and concerns.

I have copies of the following documents from the EPA web site for the Wilcox Oil Company site:

1. 2010 Expanded Site Inspection Report on Lorraine Refinery (contains summary data of the analytical lab analysis of environmental samples)
2. 2011 Expanded Site Inspection Report on Wilcox Refinery (contains summary data of the analytical lab analysis of environmental samples)
3. 2016 EPA Trip report
4. 2016 Surface Water Sampling Report
5. 2016 Borehole Geophysical Field Investigation of Selected Wells
6. 2016 Sampling and Analysis Plan (Revision 01)
7. 2016 Radiation Survey
8. 2016 Passive Soil Gas Survey

I also received the following documents:

2013 HRS Report

2016 Wilcox Oil Removal Assessment Report

Wilcox RIFS – Vapor Intrusion Detection data Excel - (Air Sampling Summary LPA and WPA data dated 9/2016) - need report for data table

Residential Groundwater Well Detection Tables Excel- (Detection Summary for GW-3,4,6,7,8,9,10,12,13,14,17 dated 9/2016) – need report for data tables

Wilcox Summary 20150831_R3 Excel (soil data dated 5/2016 and 6/2016) – need report for data table

Do you have any other reports with analytical lab data for environmental samples? If so, can you provide the data in an electronic format (Excel)?

Cordially,

Jack Hanley

Subject: RE: Wilcox options

1. the status of people living on the site, and
3 properties currently occupied
2. the timeline for EPA RI sampling plan.

Removal action: planning for end of August – residential property that has tank in front yard

Field sampling: September (weeks 18 and 25)

Potential field sampling October: weeks unknown

Katrina,

A couple of questions from our ATSDR Health Assessor. Can you provide info on Q: 2 and Q: 3.

I plan on discussing tomorrow.

Patrick

Patrick,

What would be a good time to call you on Wed., August 2?

I completed my review of the two ESI reports and screening of the ESI data. I'm ready to get your input on this site and on EPA's request. Also, I interested the following:

1. the email I understand George wrote to the EPA RPM about the lead levels,
2. the status of people living on the site, and
3. the timeline for EPA RI sampling plan.

Thanks,

Jack

Katrina,

This is what I had put together and shared with George in early June. I haven't heard anything more from him to determine which option our management would best support.

Jennifer
